Head lice
can't resist Hedrin
(which is unfortunate, 'cos it kills them stone dead)

Hedrin

For external use only. Observe normal safety precautions and always keep hair away from naked flames. Ask your pharmacist for advice. Always read the label. 2018/ADW/HED/135C

Sort Out Head Lice

Taking the drama out of head lice

You've probably got enough to worry about without the hassle of head lice. However, don't panic, because we're here to help, dealing with head lice can be straightforward if you take the right action.

Step 1

Use a comb made for the purpose, ideally white so the lice can be seen easily and with teeth no more than 0.3mm apart in order to trap head lice

Step 2

Comb through the hair using a conditioner which can help make the process more comfortable.

Step 3

Ensure the lighting in the room is good. Make sure you divide the child's hair into sections and insert the comb at the roots before gliding outwards.

Step 4

You are looking for a living, moving louse. They range in size from a full stop to a sesame seed depending on their age. When it first hatches, a young louse (known as a nymph) is transparent but after its first blood meal, it will darken to a greyish brown colour. Head lice live on, or very close to, the scalp and don't wander far along the hair shaft: unless encouraged to move to a new head.

How to treat head lice

There's no need for drama – treating head lice can be straightforward quick and easy.

Step 1

Choose the right treatment. It's worth noting that treatment should only be applied if a living louse has been found, never just in case.

Step 2

Apply the treatment in the correct way. Follow the on-pack instructions carefully ensuring the full length of hair is coated and leaving it on for the recommended amount of time.

The comprehensive and easy to navigate product range is popular with parents (earning the Mumsnet stamp of approval for Hedrin One). The Hedrin range has been proven to work and is supported by published scientific evidence. All products are skin friendly and can be used from 6 months.
